Fly connection lead

- ✓ Quality colour picture
- ✓ Built-in 4-9mm lens
- ✓ Easy & simple focus system
- ✓ Weatherproof for external use
- ✓ Low light efficiency 0.3 lux
- ✓ Great general purpose camera

The new CCT645 exterior colour camera comes with a built-in vari-focal lens that give it huge advantages over other "tube" or "bullet" type cameras that have a fixed focus board lens.

Using our new easy-focus system it is possible to alter the zoom and focus of the camera without breaking the cameras weatherproof seal. This greatly helps the installer and user get the best possible picture out of the camera without fiddly enclosures to remove or undue when perched at the top of a ladder.

At the widest 4mm setting the camera is ideal for general-purpose surveillance shots and the 9mm zoom setting is more suited for longer distance surveillance of gates and entrances. Obviously the camera is fully adjustable at all settings between 4-9mm.

The CCT645 is a great all-round camera that produces a lovely picture quality and combined with the built in 4mm-9mm lens represents outstanding value for money.
